

This Month's Tip: How to Access Supreme Lending Resources from Outside of the United States

With our personal and business travel resuming, many of us may need to stay connected to the office while on the go by using our Supreme Lending laptops. While this is not a problem when traveling within the continental United States, it is challenging when traveling abroad. To prevent cybercriminals from remotely accessing our networks for nefarious purposes, we block access from locations outside of the United States. This is a common practice used by many organizations to eliminate easy access for attackers. For team members who need to log in from international locations, we will need to set up special access to our systems and resources. The policy and process outlined below highlight the new requirements.

Policy

All Supreme Lending requests for laptop/desktop remote access from locations outside of the United States must be submitted by the employee via a Service Desk ticket **5 business days prior to departure** (per "pre-approved" business risk acceptance).

Approved Remote Access Methodology

- VPN: All laptop/desktop remote access from locations outside of the United States requires a "static IP address" (with a company-issued computer) for whitelisting purposes with a start and end date, OR;
- Nutanix Virtual Data Interface (VDI)

Policy Exceptions

Exceptions to this policy will require approval by Senior Corporate Business Management (risk acceptance).
